

Here's what our educators have to say!

Teachers

“This is wonderful... I’ve been teaching school for 16 years, and this is saving me so much time right now!”

High School Math Teacher
Wendell School District

“If it weren’t for the AI, I probably wouldn’t provide that level of feedback to students. In terms of time efficiency, if I had to provide that same amount of feedback to all the students, with 130 students, I would spend around 30 hours per week just on feedback.

It’s great that the AI provides more specific feedback than I could manage. It’s definitely a time-saver.”

Middle School Math Teacher
Fountain-Fort Carson High School

“I have been loving how easy the planning process has been when using Kiddom. I am not searching through all of the different manuals and hauling them around when planning and while teaching.

I also love the powerpoint presentations that are already there with each lesson. This makes it so much easier for my load so that I am not making powerpoint presentations each day for both my skills/module lessons.

Everything is clear, accessible, and easy to use – making it a smooth process to implement in my classroom!”

Elementary School Teacher
West Contra Costa Unified School District

Administrators

“The teachers are absolutely loving it. It’s great... They’re getting how to personalize their decks and how to write their lesson plans with it. They definitely feel like the scholars are much more engaged in the classroom.”

Chief Instructional Officer
The Lincoln Academy

“We’re now getting access to information we never previously had. The data drives educational equity because we can monitor what students can do and are on the verge of being able to do.”

Lead Numeracy Coach
Metro Nashville Public Schools

“The Kiddom Team continues to be so on top of everything and so supportive, so we feel really great.”

Elementary Curriculum Coordinator
The École New York

Kiddom is trusted by schools and districts of all sizes
